Subject: Australian Custom Vessels - safety zone exemption

Gents

In your regular dealings with operators could you Pls mention that an exemption has been granted by the Director PD to the Australian Custom Service Vessels (ACVs) from the prohibition to enter Safety Zones around petroleum facilities. This exemption is subject to one condition; that the Master of the ACV must establish that it is safe to enter the Safety Zone by contacting the owner/operator of the well, structure or equipment around which the Safety Zone has been declared.

You can find the exemption letters - if you're interested - on file A1611/200301.
