AUSTRALIA'S DRILLING INDUSTRY HEALTH SAFETY AND ENVIRONMENT FORUM

# DrillSafe

## Forum Opening

# AGENDA

- 1 Welcome
- 2 Status
- 3 Challenges ahead
- 4 Dropped objects
- 5 Software issues - limiting the risks
- 6 Conclusion

# 1. WELCOME

-Maersk Drilling proud to sponsor

-We need DrillSafe

NOPSA:

“High safety performance requires genuine commitment and participation by industry, being Operators and the workforce, and by the regulator.”

“NOPSA expects strong and sustained leadership from industry to continually improve robust health and safety systems at offshore petroleum facilities.”

## 2. STATUS

Where are we as an industry?

- Steadily moving in the right direction!
- Still a lot of work to do!

NOPSA Report:

- Injuries: Positive development
- Incidents: Increase!
- Safety culture: Concerns

Quote: “considerable variation between facilities”

## 3. CHALLENGES AHEAD

“Data continues to show”

Top three root causes of offshore safety incidents are:

- preventive maintenance
- procedures not used or not followed
- design specifications requiring improvement

## 4. Dropped objects

A number of recent incidents

Why?

## 5. SOFTWARE

“Issues” => Incidents

How do they arise?

How can we prevent them?

- process, who is involved?

specification – design – contracting – construction –  
installation – commissioning – operation

What can be improved?

## 6. Conclusion

Are we ready for the H & S challenges we face?

- Awareness
- Focus
- Commitment
- Open Environment
- Competent and dedicated people at all levels

Questions? Comments? Observations?
